

Constructing Population Pyramids

Using the statistics provided in class construct 6 population pyramids.

Give the location for each population pyramid on the line above each graph.

The example to the right will be completed in class using the statistics below:

Bahrain					
Age	Both sexes	Male	Female	Male %	Female %
Total all ages	708573	394330	314243	55.65129	44.34871213
0- 4	61481	31093	30388	4.388115	4.288619521
